Event 3 – Pedestrian Stop – ARCON
Session 12 – Searches and Handcuffing Exercise Test
LD 33 – Arrest and Control
Exercise Test – Searches and Handcuffing

Purpose: This activity will evaluate the students' ability to demonstrate proper searching and handcuffing techniques.

Description: The instructor will first notify the class that this is an evaluated activity and ask if there are any final questions before the test begins. The students will then wait outside in pairs to be called in by an instructor. Each available instructor (use as many as are available) will call in a pair of students and test them individually, with one student acting as the suspect, and the other as the officer being evaluated. The instructor will order the student to complete a pedestrian stop and a pat down search. The student will give commands, approach the suspect, and immediately demonstrate speed cuffing. The student will then immediately conduct a pat down search of the right side of the body.

The instructor should use the search and handcuffing grading sheets to evaluate the student. After evaluation, the students will switch roles and the new officer will be evaluated in the same manner. Once both students have been evaluated, the instructor will call another pair of students into the room for testing.
