Session No. 13 – Marksmanship/Range Drills

- E. Instruct the recruits to perform out-of-battery speed reloads and holster a loaded pistol whenever their guns go empty and they have available, loaded magazines. If there are no loaded magazines available, the drill is over and they should unload and holster an empty pistol.
- F. When the line has been declared safe, have the recruits move forward and mark the holes with an assigned mark on the target. Have the line instructors evaluate the targets and give feedback to the recruits they are overseeing.
- G. Repeat the skip loading process, as time permits. As the class progresses, reduce the ratio of snap caps to live ammo.
- H. The instructor may choose to increase the number of controlled presses on a snap cap by having the recruits press an additional one or two times on a snap cap by having the recruits perform chamber checks to reset the trigger.
- I. Advise the recruits that they may need to rest at the low ready after clearing the chamber of the snap cap to avoid fatigue, which can lead to poor marksmanship. At this time, no time limit should be imposed on the recruits.
