Hours: 2

LD 35 (RBC Calendar Location Week 9)

LOCATION: Range

TRAINING NEEDS: None

HANDOUTS: None

I. Live-Fire Range Drills: Skip Loading (1/2 hour)

- A. Assemble the recruits in a class circle, and give them specific skip loading instructions for the first drill of this session.
- B. The magazines should be loaded with a reduced ratio of snap caps to live ammo.
- C. Have the recruits skip load one or two magazines per evolution, depending on how many snap caps are used in each magazine.
- D. Instruct the recruits to fire the skip loaded magazine on a particular silhouette target.
- E. Instruct the recruits to perform out-of-battery speed reloads and holster a loaded pistol whenever their guns go empty and they have available, loaded magazines. If there are no loaded magazines available, the drill is over and they should unload and holster an empty pistol.
- F. When the line has been declared safe, have the recruits move forward and mark the holes with an assigned mark on the target. Have the line instructors evaluate the targets and give feedback to the recruits they are overseeing.
- G. Repeat the skip loading process, as time permits. As the class progresses, reduce the ratio of snap caps to live ammo.
- H. The instructor may choose to increase the number of controlled presses on a snap cap by having the recruits press an additional one or two times on a snap cap by having the recruits perform chamber checks to reset the trigger.
- I. Advise the recruits that they may need to rest at the low ready after clearing the chamber of the snap cap to avoid fatigue, which can lead to poor marksmanship. At this time, no time limit should be imposed on the recruits.
- J. Have the recruits skip load at different distances to reinforce firing body shots and failure drills .
