Warrant Teletype Unit Training Guide

The Basics

2018

Table of Contents

Table of Contents

Welcome to the Warrant Teletype Unit (WTU). The aim of this training guide is to reinforce the information presented by the trainer, and to serve as a companion to the "Warrant Teletype Unit Manual" booklet.

Throughout the training process, your trainer will be covering all the duties and functions involved in WTU. Please ask questions throughout the training process and alert your trainer when you do not understand a particular subject matter. Your trainer will gladly go over the subject matter again (sometimes with a different approach) so that you will understand and be able to perform without any issues. Take plenty of notes and organize them for future use.

In this training guide, you may find three visual styles to draw attention to specific information:

Contains the name and page number of the "Warrant Teletype Unit Manual" booklet that will provide additional information about a specific subject.

Contains the definition or information on specific highlighted word(s) found on the same page.

Contains a warning that should not be ignored.

This training guide was created by Edwin Espinoza. Future revisions will be done as needed.

Objectives

The Training Unit Guide is divided into three sections.
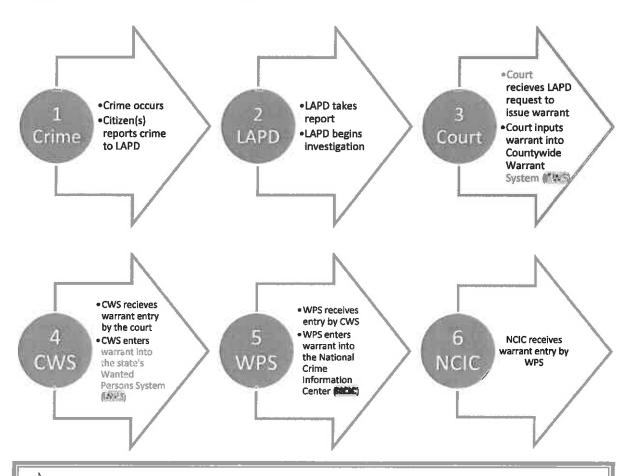

> ➤ Introduction

> ➤ Basic Teletype Duties

> ➤ Basic Phone calls

After completing the above sections, you will be given an "open-book" quiz to ensure that you are ready to proceed to the next phase of your training. Once fully trained with subject matter covered in this guide, you will be able to do the following objectives while working in WTU:

> ➤ Recognize and access the different computer systems and databases.

> ➤ Provide LAPD warrant information to authorized law enforcement personnel.

> ➤ Relay all teletype communications to the appropriate internal and external entities.

Warrant Overview

Before we can discuss the duties and functions of the Warrant Teletype Unit, you must first understand the process of how a warrant is created and what happens to a warrant. See diagrams below:

1 Crime
- Crime occurs
- Citizen(s) reports crime to LAPD

2 LAPD
- LAPD takes report
- LAPD begins investigation

3 Court
- Court recieves LAPD request to issue warrant
- Court inputs warrant into Countywide Warrant System (CWS)

4 CWS
- CWS recieves warrant entry by the court
- CWS enters warrant into the state's Wanted Persons System (WPS)

5 WPS
- WPS receives entry by CWS
- WPS enters warrant into the National Crime Information Center (NCIC)

6 NCIC
- NCIC receives warrant entry by WPS

☆ What is CWS?
CWS represents the Los Angeles Countywide Warrant System. The system was implemented in 1988. CWS contains all warrants issued by LA Superior Courts and all temporary warrants issued by individual law enforcement agencies located within the county. Los Angeles County Sheriff's Department (LASD) was appointed as the system proprietor and thus maintains and manages CWS.

☆ What is WPS?
WPS represents the Wanted Person System. It is a state database pertaining to fugitives and warrants.

☆ What is NCIC?
NCIC represents the National Crime Information Center. This is a Federal system which controls access to law enforcement data in Federal data bases.

3

WTU Overview

WTU is responsible for providing ▓▓▓▓ information to LAPD personnel and to outside law enforcement agencies. This is done in person, by phone, or by ▓▓▓▓. WTU may send out a warrant information sheet (▓▓▓) for an agency to review and to determine if the information on the WIS matches the subject being detained or who is in custody. If it's a positive match, then an ▓▓▓▓ may be sent which authorizes the agency to begin or continue the ▓▓▓▓ process.

Abstracts are received by the law enforcement agency as a teletype. Teletypes are an integral function of WTU. Teletypes received at WTU must be routed accordingly to the different LAPD divisions for proper handling. Those teletypes not routed are personally processed within WTU.

☆ What is a warrant?
An arrest warrant is a warrant issued by a Judge on behalf of the state, which authorizes the arrest and detention of an individual, or the search and seizure of one's property.

☆ What is a teletype?
A teletype is a printed message sent by law enforcement agencies containing confidential information. It's how law enforcement agencies communicate and share information. A teletype can be sent to one destination or multiple destinations at the same time.

☆ What is a WIS?
WIS represents Warrant Information Sheet. A WIS contains warrant information about a subject.

☆ What is an abstract?
A booking abstract is documentation received via teletype that gives information about a warrant and authorizes an agency to book subject into custody.

☆ What is booking?
Booking is the way in which law enforcement creates an official arrest record. The process generally involves photographing ("mug shot"), fingerprinting, and otherwise recording identifying data from the subject.

4

WTU also receives ███████████ from the Los Angeles Superior Courts for entry into the California Restraining and Protective Order System (███████). Restraining orders require a Division of Record (DR) number for entry. If none are shown on the restraining order, it has to be given to the Specialized Reports Distribution Unit (SRDU) for processing. Once a DR number is given, the restraining order is sent back to WTU for entry into CARPOS.

> ### ☆ What is a restraining order?
> A restraining order (also called a "protective order") is a court order that can protect someone from being physically or sexually abused, threatened, stalked, or harassed. The person getting the restraining order is called the "protected person." The person the restraining order is against is the "restrained person."

> ### ☆ What is CARPOS?
> CARPOS represents the California Restraining and Protective Order System. CARPOS is a state system database that is managed by the Department of Justice.

JDIZ Printer ("County" Printer)

WTU receives teletypes on this printer from law enforcement agencies within Los Angeles County. When we receive teletypes on this printer, the agencies are mostly using the ▓▓▓▓▓▓▓▓, J/XLOC, which will send messages to all agencies within Los Angeles County. These messages are typically ▓▓▓▓▓▓▓▓▓ (APB's) or more commonly known as "Broadcast" messages. When these messages are received on the JDIZ printer, they are routed by WTU employees to the mnemonic, G/GLOX, via ▓▓▓. The mnemonic G/GLOX will send a message to the LAPD printers located at Communications Division, Valley Communications, and to all geographic Division's record units at the same time. Each division will take action accordingly once the teletype is received on their printer. Please note that a few messages received on the JDIZ printer may not be a Broadcast message and may be addressed to a specific LAPD employee, division or jail. In this case, the teletype may be routed accordingly by using the mnemonic listed on the Quick Reference guide found at your cubicle. The JDIZ printer is assigned a mnemonic that can only be used within LAPD. If for example, Southeast Records wanted to send a message to WTU at this printer, they would use JDIZ. These "in-house" mnemonics are called NECS mnemonics. Outside agencies would not be able to use JDIZ as a destination because they do not have access to NECS.

📣 WTU Manual
Page 22

☆ **What is a Mnemonic?**
The Mnemonic is the computer address of a particular terminal within California.

☆ **What are All Point Bulletins (APB's)?**
APB's are administrative messages that are distributed to all law enforcement agencies in California.
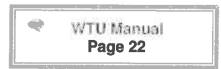

☆ **What is NECS?**
NECS represents Network Communications System. NECS is a message switching computer which controls access to LAPD's various databases and it enables any terminal within the Department to access virtually all local, County, State, and Federal databases.

6

WSSP Printer ("Shred" Printer)

Teletypes received on this printer are generated when an LAPD warrant is entered into CWS or when the subject of a warrant has been arrested and booked. <u>Most</u> of these teletypes are shredded. The only ones to keep an eye out for are ▓▓▓▓▓ warrants (except warrant numbers that begin with JUV). These particular teletypes will be

> ☆ **What is felony?**
> An offense, as murder or burglary, of graver character than those called misdemeanors, especially those commonly punished in the U.S. by imprisonment for more than a year.

placed in the Fugitive's in-tray instead of shredding them. Please note that in order to do our part in saving trees (and to save the City some money), WTU employees will have to make sure both sides of the teletype have been used before shredding. If the backside hasn't been used, the teletype is placed back into the printer tray (printed side face up).

TTYP Printer ("Out-of-State" Printer)

WTU receives teletypes on this printer from law enforcement agencies outside of California and outgoing messages from LAPD divisions. One of the most common teletypes received are "Ten Print Inquiry Notification" teletypes. These are generated whenever fingerprints are submitted to the FBI's Integrated Automated Fingerprint Identification System (   ).

> ☆ **What is IAFIS?**
> IAFIS represents Integrated Automated Fingerprint Identification System. This is a national automated fingerprint identification and criminal history system maintained by the Federal Bureau of Investigation (FBI).

Every arrestee throughout the nation gets their fingerprints submitted to this system. If a match occurs with an existing warrant in NCIC, both the agency that submitted the fingerprints and the agency that has the outstanding warrant in NCIC will be notified with a "Ten Print Inquiry Notification" teletype. When WTU receives these teletypes, we route them accordingly to the area division, missing persons unit, or fugitives section.

"   " teletypes also arrive on the TTYP printer. WTU will have either 10 minutes to respond or one hour depending on the teletype. Failure to meet the time limit will cause the agency to send a second request and cause Department of Justice (DOJ) to contact WTU by phone. DOJ will verify that WTU has received the hit confirmation and that a response is being worked on.

> ☆ **What is a Hit Confirmation Request?**
> A Hit Confirmation Request is a teletype message from an outside agency attempting to confirm whether or not an LAPD entry (wanted person, stolen gun, stolen vehicle, etc.) is still active. If hit confirmation request is on a wanted person, agency will want to know if LAPD will extradite from the state where the subject was arrested.

Outgoing messages (from LAPD employees) sent to outside agencies will show up on this printer as a copy for LAPD to keep. WTU employees will simply initial these teletype copies and file accordingly. There is no need to route these particular teletypes to any mnemonic.

8

LOPZ Printer ("State" Printer)

WTU receives a majority of teletypes on this printer from law enforcement agencies <u>within</u> California. However, some teletypes will be from out of state agencies. Due to the various types of in-state teletypes received on LOPZ, this printer is reserved as the last printer to be trained on.

LAPD's ▪▪▪▪ mnemonic is "LOP0". Law enforcement agencies will be using this destination code to send messages to LAPD. Sometimes agencies will be using a mnemonic that send messages to multiple agencies at once. Some of the group codes used that are received on LOPZ printer are "1500" (for Los Angeles area), "3200" (for all agencies within the state), and "4500" (also for all agencies within the state but for specific emergencies only).

> ☆ **What is CLETS?**
> CLETS represents California Law Enforcement Telecommunications Systems. CLETS is a high- speed message switching system which accesses various databases and allows law enforcement and criminal justice agencies to directly interface with Oregon and Nevada. An agency can also transmit a free text message to another agency within California or via NLETS to another state or Canada. Access to CLETS is via NECS.

9

Rules

There are a variety of phone calls received in WTU. Here are some important rules to keep in mind:

> ➤ WTU employees are not authorized to give out warrant information to the general public. Any civilian requesting warrant information should be directed to visit the nearest police station or to contact LA County Superior Court at (213) 974-6141.

> ➤ Outside law enforcement agencies (with the exception of the LA County Courts) must provide an Originating Agency Identifier (████) number for verification when requesting warrant checks or information.

> ➤ Requests by outside law enforcement agencies for faxing of warrants, restraining orders, or any LAPD records must be approved by a supervisor. If immediate supervisor is not available, contact the watch commander.

> ➤ Occasionally, you may find the need to transfer callers (outside law enforcement agencies) to RACR. Remember; never give out their phone number.

WTU Manual
Page 8

☆ **What is an ORI?**
ORI represents Originating Agency Identifier. ORI is a number assigned by the FBI to identify users of the computer systems.
For example: CA0194276

██ represent the state (California)

████ represent the county (Los Angeles)

██ represent the agency (LAPD)

██ represent the **division of the** agency (R&I)

Warrant Check (California calls)

To conduct a warrant check, you have three options in order to go to the CHK format screen ("Warrant Check" screen):

> ➢ Hit the PF 17 key (most popular choice),
> ➢ Hit shift key and F5 key at the same time, <u>or</u>
> ➢ Type **CHK** and hit the enter key.

```

❿   Vehicle license plate number

⓫   ORI number of filing agency

14

A "name search" is the most common type used in WTU. The response will come from CWS. The "▮▮▮▮" within the message will either match the name and date of birth exactly or come close to it. Exact matches, if any, will always be at the top of the message. A message can have multiple pages. To scroll to the next page of a message, hit PF 20.

> ### ☆ What is a hit?
> A hit is a particular piece of information contained within a message as a result of an inquiry made in NECS. The word "hit" is commonly used after conducting a warrant check. Exact matches to the inquiry are considered "positive hits" whereas non-matches are considered "negative hits" or "no hits."

As you can see in the example in STEP 1C on the previous page, there is an exact hit on the name and date of birth. Whenever an exact hit is shown, it signifies that the subject has an active warrant. The next step is to look at the ORI number to see if it belongs to LAPD. If it begins with CA01942, then it is an LAPD warrant. The last two digits correspond to the division assigned to the warrant (see definition and example of an LAPD ORI on page 10).

Before proceeding to the next step, it is suggested at this point to write down the caller's ORI number, warrant number of the exact hit, charge code, charge type, and bail amount for future reference. See next page for next step.

At this point, for the example shown on page 14, inform the caller the following:

> ➤ LAPD holds a <u>felony</u> warrant for 288(A)/PC.
> ➤ The warrant is for $50,000 bail.

<u>Note for outside law enforcement agencies calling from within California:</u>

> ➤ LAPD will "pick up" (or extradite) on all felony warrants within California.
> ➤ If it is a misdemeanor or infraction warrant, the bail amount has to be <u>over</u> $25,001 or no bail for LAPD to extradite. If $25,001 or less, you may advise the agency that the warrant is citable. **Note:** If there are multiple misdemeanor or infraction warrants where the combined total reaches above $25,001, then LAPD will extradite.

<u>Background information on the "over $25,001 bail" rule</u> - LA County Sheriff's Department (LASD) picks up all arrested subjects on LAPD's behalf throughout California. They implemented the above rule on October 11, 2010.

The next step is to send the caller a WIS. See next page.

STEP 3A Warrant Information Sheet (WIS)

Agencies will now be requesting the abstract, but a
warrant information sheet must be sent first. Use
the CHK2 (PF5) format to send the WIS. Obtain
the CLETS mnemonic for the destination and fill out the fields as shown below:

```
CHK2                    AKA/INVESTIGATION INFO INQUIRY

REQD BY: ▓▓▓▓▓▓▓        SER ▓▓▓▓ CA019 ____   WARR# ▓▓▓▓▓▓▓▓▓
(*) WIS ▓  NAM CHK ▓▓▓  ROUTE TO PRINTER ▓▓▓▓ ▓▓▓

(*) RELEASE WIS? _

(*) WARRANT DETAIL INFO  _

(*) AKA INQUIRY _   AKA# __

(*) INV INFO INQUIRY _   START DATE _____  TIME ____  ROUTE TO PRINTER _____
*INFO* WARR #XCNBA30010401-WIS SUCCESSFUL
```

⬆ **Good Response**

The above response shows that the WIS was successfully sent. Inform the
caller that you have sent the WIS and to review the information and make sure
the information matches the subject in their custody. If the agency states that
the printer is not near the caller, they will have to call back. When the agency
states that they received the WIS and it matches their subject, go ahead and
release the WIS.

STEP 3B

```
CHK2                    AKA/INVESTIGATION INFO INQUIRY

REQD BY: CA0123456_____   SER V8210 CA019 ____   WARR# XCNBA30010401
(*) WIS _   NAM CHK FLORE  ROUTE TO PRINTER VAMO C____

(*) RELEASE WIS? ▓

(*) WARRANT DETAIL INFO  _

(*) AKA INQUIRY _   AKA# __

(*) INV INFO INQUIRY _   START DATE _____  TIME ____  ROUTE TO PRINTER _____
*INFO* WARR #XCNBA30010401-SUCCESSFUL ADD/CHG
```

⬆ **Good Response**

17

STEP 4A   **Abstract**

You must release the WIS before an abstract can be sent. Clear your screen, type OCB, and hit enter. This will take you to the "Out of County Booking" screen. Fill out format as shown below:

```
OCB                      OUT OF COUNTY BOOKING

ENT  BY              SER         ORI CA019 ____ OPR         ROUTE TO

_____     ____
```

Since the example we are using is a felony warrant, you will have to ask additional questions before you can send the abstract to them. You will need to ask them questions from the WTU Felony Warrant Form that is on your computer desktop. Once you get your answers, you may then send out the abstract.

STEP 4B

After sending abstract, do the following:

a) Fill out log in the notebook found near TTYP printer.
b) Send a WIS to a printer near you (if you don't already have a WIS).
c) Attach Felony form (on felony warrants only) to WIS and place in Fugitives red tray by copy machine.

18

CALIFORNIA CALLS QUICK SUMMARY

Fill out fields as shown below:

```
CHK                    WANT/WARRANT NAME AND NUMBER    CHK

REQD BY: ▮▮▮▮▮▮▮▮▮▮ SER ▮▮▮▮ CA019 _____ ACTION S  ROUTE TO _____

(Page 2)

The message above is the 2nd page of the IW message and is showing extradition information on the MIS field.

If REF & MIS field shows that WTU made the "NOEX" entry, then tell the caller "LAPD will not extradite."
(Example: REF/SMITH 32456 SOE MIS/NOEX OUTSIDE CA)

If REF & MIS field shows that WTU made the "Extradition Approved" entry, then tell the caller that "LAPD will extradite."
(Example: REF/SMITH 32456 SOE MIS/WTD MURDER,NO BAIL,24HR WRT VERIF 213-486-8260,EXTRADITION APPROVED)

If REF or MIS field does not show any indication that WTU entered any extradition info, then contact with fugitives section or RACR must be made.
(For the example above at the top of the page, the NOEX message was not entered by WTU.)

These types of inquiries can be useful at times for reference only. Detectives will occasionally place extradition information here. Please note that if you do see an entry where extradition was denied, it doesn't necessarily mean it will be denied again. Any extradition info you find here, you can give to Fugitives or RACR when calling them about extradition on a warrant. Hit PF 20 to see next page.

QUIZ RULES: This is an "open book" quiz. You may use this guide, the WTU manual, or your notes to assist you in completing the quiz. The quiz will not be graded and is just another part of the training process. Once you are done with the quiz, you may turn to page 41 for the answers. Your trainer will review any questions you have afterwards, especially with any part of the quiz you answered incorrectly. You may now begin taking your quiz.

Circle the letter that gives the best answer to each question:
