Commissioners,

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hotlists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its racist profiling and gaslight community members who know and report their experiences by failing to sustain a single racial profiling complaint. No dashboard can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; through fear of shared knowledge and public comment, the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on the number of speakers and no 45-minute time limit. Members of the communities most affected by police are the most knowledgeable

about the real-world effects of the matters before the board and about LAPD in their neighborhoods, and you need to hear what they have to say.

Signed,

Michele Wetteland

Crooked Commissioners,

First and foremost, tell Steve Soboroff to shut his mouth when I'm giving my public comment. If he can't take criticism, then he should retire from the commission.

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda

items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Fuck off,  
Jason

Commissioners,

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Christina Chapman (She/Her)

**ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.**

Dear Board of Commissioners and City Council Members:

As a citizen of Los Angeles District 11 I'm writing to submit public comments to the LAPC Meeting.

**Agenda Item 4A**

As with all surveillancing tools LAPD uses (and you continue to allow), Automated License Plate Readers (ALPR) cameras are used disproportionately towards black, brown, and poor communities. The pictures ALPR cameras take are then checked against "hot lists" and stored for years as part of LAPD's continued infringement of privacy rights, tracking, and stalking.

LAPD already invades citizens' privacy rights plenty enough with all of the data they track on especially Black, brown, and immigrant communities. LAPD already does this by sharing information with ICE through fusion centers. Adding ALPRs will expand LAPD's massive surveillance system, thus expanding their systems of discrimination.

We demand you reject this contract and remove ALPRs from our community.

**Agenda Items 5A-5B**

We already know that LAPD has along history of discrimination and continues to show a deep racial bias, orders for stops, frisks, searches, interrogations, and arrests of Black, brown, and Indigenous folks at a far higher rate than white folks. This has been proven every year. But you for some reason trust LAPD to do its own investigations and each year it conveniently finds that zero of their actions were due to racial profiling. This is obviously bullshit, but you as the commission still continue to allow it to happen. The way to improve LAPD's discrimination is to completely stop LAPD's use of pretext stops and to end funding for RIPA data.

**General Public Comment: Public Comment Limitations**

Stop capping your meetings' public comment period at a mere forty-five minutes. You give 45 minutes for public comment from a city of 4 million people. Despite your weekly protestations to the contrary, you are silencing the voices of Angelenos by limiting who can speak at your meetings, and for how long.

Let people speak after each agenda item; the other way doesn't make sense.

Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

**General Public Comment: LAPC Meeting Time**

Why are these meetings held at the same time as City Council and Board of Supervisor meetings? Can we please change the meeting time so more people can participate in the meetings?

Sincerely,  
Sarah Bowers

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Thank you,  
Courtney Valentine

Commissioners,

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Signed,  
Lucas O'Connor

**Subject:** Public Comment BOPC 1/31/2022 (An LAPD helicopter hovered over MacArthur Park for over 40 minutes at 3AM in the morning...)

**ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.**

An LAPD helicopter hovered over the MacArthur Park community for over 40 minutes on 01/29/22 and I'm wondering how that was public safety??? How did that HELP the residents that have to go to work at 7AM in the morning now that their sleep was disrupted by loud noise and pollution and how does it help unhoused residents, some of which are struggling with mental, behavioral, and rehabilitation healthcare needs??? That constant loud helicopter noise and pollution is definitely triggering PTSD in residents who DON'T NEED to be triggered!

We are living in a violent colonist system and right now more than anything our communities need investments. It's critical for the well-being of EVERYONE as a collective. NO! .....more armed police are not going to help us because as we saw in North Hollywood, spraying off bullets to kill a person likely experiencing mental health issues impacted innocent civilians specifically Valentina Orellana Peralta (and her family) whose life was stolen by an officer who was supposed to be performing at a level that was above that of an average civilian.

Poverty has continued to grow in our local communities, and as it grows so does crime. As we reimagine safety we must commit to dismantling the original **slave patrols** in order to form a new public safety team that does not join gangs and does not spray bullets into busy stores. **We need more money going to workers in the mental and behavioral healthcare field.**

When we see residents in and out of jail, that likely means something about the conditions they are living in when they are out of jail needs to change. We need youth gang and crime prevention programs. PSH wrapped with services (no it shouldn't feel like jail just because someone lives in permanent supportive housing). We need better family planning likely attached to planned parenthood and we need to restructure our no social service programs because they are out of wack at the moment. We need better programs and stabilization for our foster youth and so much more. Commit to safety but investing in and saving the next generation, 911, it's an EMERGENCY!!!!

Good Morning Commissioners,

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-

minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Signed,

Athena Wheaton

Commissioners,

It's bizarre that Steve Soboroff goes off camera for public comment. Decker? Calanche? Bonner? Briggs, even? Are you OK with your colleague doing that? Follow-up: how do you sleep at night?

In 4a, LAPD is requesting a contract with Motorola to purchase Automated License Plate Reader (ALPR) cameras and software from Vigilant Solutions, recently acquired by Motorola. ALPRs take pictures of people's license plates and anything in the area, and store them in databases. Black, brown, and poor communities are heavily and disproportionately targeted by ALPR patrols, which check the plates against "hot lists" and store the scans for many years as part of LAPD's constant data gathering, tracking, and stalking.

Vigilant Solutions continues to be widely used by local and national law enforcement agencies as well as ICE, and has even provided ICE with step-by-step guides on how to get license plate data from other agencies. LAPD already shares information with ICE through fusion centers, which are massive data warehouses that store and analyze data. This surveillance will continue and expand as LAPD adds additional ALPRs, disproportionately used to scan and track plates in Black, brown, and immigrant communities. We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after

hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Zach Sherwin

We reject this contract, and demand ALPRs be removed from our communities!

Items 5A and 5B are related to LAPD stops, and the Racial and Identity Profiling Act, or RIPA. For as long as LAPD has existed, police have demonstrated a deep racial bias, ordering stops, searches, interrogation, and arrests of Black, brown, and Indigenous folks at far higher rates than those of white folks, and this has additionally been demonstrated every year that LAPD or any other agency has reported on the department's stop data. Further, the commission continues to allow LAPD to lie about its own racist profiling and to gaslight community members who know and report their experiences, by failing to sustain a single complaint of racial profiling. There is no dashboard that can improve this for LA's Black community members, and no policy. We demand an end to LAPD's use of pretext stops, and no more funding for the collection of RIPA data.

Regarding public comment - let people speak after agenda items! The community must have input on agenda items after hearing additional information on the item; it is through fear of public knowledge and public comment that the Police Commission does not currently allow this.

Decrease Moore's time and open up public comment, with no restrictions on number of speakers and no 45-minute time limit. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before the board, and about LAPD in their neighborhoods, and you need to hear what they have to say.

Signed,  
Ted Trembinski
