Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveill, occupy, and destroy.

Luis Herrera was **the 13th person** killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades](#).

Motorola, that Michel Moore will visit with in November, has referred to Jordan Downs as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company **has made billions of dollars** in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD

technology expansion and purchases; all while LAPD remains the most murderous police department in the United States and is killing people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. **No more surveillance technology in communities; no more funding for LAPD!**

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. **Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment.** Week after week, your actions belie your hollow claim to be the "citizen's voice in police affairs."

Signed,

Carter Moon

The LAPD is killing people at approximately the rate of one person every 2 weeks. How can we continue to fund a system that causes violence, death, and trauma to communities? It is time we recognize that more funding to the LAPD is not a solution, in fact it's quite the opposite. It's time our officials utilize the evidence we have and do what they were elected to do--keep people safe, not fund a murderous police force.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveil, occupy, and destroy.

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveill, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - and this has been the case for decades.

Motorola, that Michel Moore will visit with in November, has referred to Jordan Downs as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD technology expansion and purchases; all while LAPD remains the most murderous police department in the United States and is killing people at a rate of

approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment. Week after week, your actions belie your hollow claim to be the "citizen's voice in police affairs."

Signed,

Commissioners,

How can you continue to serve on this, what is supposed to be a civilian oversight body, when LAPD continues to wantonly kill without cause and against all sense. Compassion alone should cause you to make some efforts to stop this violence, yet you do nothing!!!

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveill, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades](#).

Motorola, that Michel Moore will visit with in November, has referred to Jordan Downs as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD

technology expansion and purchases; all while LAPD remains the most murderous police department in the United States and is killing people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment. Week after week, your actions belie your hollow claim to be the "citizen's voice in police affairs."

Signed,
J.Stephen Brantley

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday. Yet another young Angeleno's life has been abruptly cut short by the police.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveil, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody. THIS IS UNACCEPTABLE.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades](#).

Motorola has referred to Jordan Downs as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Michael Moore will visit with Motorola in Chicago to discuss future LAPD technology expansion and purchases. There is no evidence that this partnership has improved safety for LA residents at all, especially while LAPD continues to kill people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades](#).

In November, Michel Moore will visit with Motorola, a company that has referred to Jordan Downs as a “test bed” for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD technology expansion and purchases; all while LAPD remains the most murderous police department in the United States and is killing people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual’s public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment. Week after week, your actions belie your hollow claim to be the “citizen’s voice in police affairs.”

Signed,
Lucia Pier

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveil, occupy, and destroy.

Subject: LAPD needs OVERSIGHT, REFORM, REAL CHANGE

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Dear Commissioners,

What is your job?

I shake my head and I yield to the grieving families who deserve to be heard. The very least you could do it listen to them. Please extend the public comment time to give ample time for all grieving family members time to speak. And if that is too painful for you- you need to ask yourself- wouldn't it better to limit the killing of the police? Wouldn't that be more humane for everyone? Rather than limit the time for public comment? May I ask you- where else are grieving families supposed to go?

The LAPD, the Los Angeles Police Department is one of the most murderous police departments in the United States.

The body you are to OVERSEE is killing people at a rate of approximately 1 person every 2 weeks. This does not include people who die each week in custody at facilities in Los Angeles, known as "Correctional Facilities."

My question is- WHAT is the aim of this commission? Are you willing to look at the damage that is happening and see that you are a part of this carnage? AND that you CAN CHANGE this cycle of harm? I email you frequently with hope in my heart that you will change course.

My name is Kirsten. I am suburban Mom of two. I pay my taxes and I LAMENT that money goes to KILLING, and "protecting property" at the EXPENSE of KILLING every day citizens in this city. And I keep count and I SEE THE PATTERN where the LAPD kills people who are mentally challenged, in financially struggling neighborhoods, who are most likely black, brown, queer, mentally struggling, in need of shelter, services or healthcare, etc. DO YOU SEE THIS PATTERN?

Putting more money in technology, putting millions of dollars a day into new toys in the name of "security," is NOT working. Locking people up is not keeping our streets safe. Killing people harms entire networks and neighborhoods.

I beg you to look at this pattern and invest in communities. I beg you to look at ways to put dollars towards programs that HELP, that support, that SUSTAIN human life.

19-year-old Luis Herrera died this past week. Luis Herrera died on his own front porch. Luis Herrera's Dad yelled at the LAPD to stop, and he could not protect his son from the killing machine of the LAPD. I mourn for Luis Herrera who would be turning 20 had this event not occurred, had there been any way to stop a group of armed uniformed officers, whose training kicked in to kill. There was no pause button, no alternative, no training, no new practice, no new policy from this OVERSIGHT committee whose JOB it is, TO PROTECT AND SERVE CIVILIANS...

And I ask you- what will prevent this from happening in two weeks?

What are you doing, Commissioners, to change this behavior of killing unarmed people, NOW?

The question is- what will you do, Commissioners?

What are you waiting for?

And if your answer is more money for weapons, more money for "surveillance"- I can see I will be emailing you again, in two weeks with a sad heart and a grieving family. Do you see it? Do realize that you are hunting down and killing people? When I see the word "surveillance"- that is what I see. Your own taxpayer citizens are not animals to be hunted. They are people who need SERVICES- services that we, the people, can provide. And services, the people of Los Angeles have VOTED for in a care first agenda.

In two weeks time- will my email thank you? or will I have a heavy heart for yet another grieving family?

It is entirely up to you. Are you ready for a change? What are you waiting for?

Sincerely sad,
Kirsten Caplan

Motorola, that Michel Moore will visit with in November, has referred to one of these communities, Jordan Downs, as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD technology expansion and

purchases; all while LAPD remains the most murderous police department in the United States and is killing people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment. Week after week, your actions belie your hollow claim to be the "citizen's voice in police affairs."

Signed,
Hannah Gibson

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveill, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades.](#)

Motorola, that Michel Moore will visit with in November, has referred to one of these communities, Jordan Downs, as a “test bed” for LAPD and Motorola surveillance technology. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveill, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

In addition to all this, LAPD continues to demand more - more from the city budget, more resources for police (including subsidized housing for new recruits, in a city where five people die every day from conditions related to lack of housing and access to services), more weaponry, devices, contracts, and "smart" technology. Meanwhile many Los Angeles communities, including Watts, where LAPD has five "Community Safety Partnership" substations, lack access to fundamental necessities including clean air and water - [and this has been the case for decades](#).

Motorola, that Michel Moore will visit with in November, has referred to one of these communities, Jordan Downs, as a "test bed" for LAPD and Motorola surveillance technology. In 2007, Motorola and LAPD published a case study of Jordan Downs, promoting Motorola surveillance products (while providing PR for LAPD). The company has made billions of dollars in profit from selling surveillance gear to police, though any benefit at all to Jordan Downs residents remains unclear. Regardless, Moore will visit with Motorola again in Chicago to discuss future LAPD technology expansion and purchases; all while LAPD remains the most

murderous police department in the United States and is killing people at a rate of approximately 1 person every 2 weeks; even more if you include people who have died in custody. No more surveillance technology in communities; no more funding for LAPD!

Remove the 45-minute time limit on public comment, thereby allowing every single person who calls in to have an opportunity to speak. Remove the two-time limitation on each individual's public comment. Allow community members to speak after every single agenda item, as opposed to continuing the patently ludicrous practice of forcing the public to speak before any of these items have been discussed. Inform the public who is up next to speak. Resume in-person meetings. In general, make every effort to remove procedural barriers and impediments to civic expression, and discontinue your visible displays of irritation with and hostility towards the public you purport to serve. Members of the communities most affected by policing are by far the most knowledgeable about the real-world effects of the matters before this board, and about LAPD in their neighborhoods, and you should be doing everything you can to make it easy for them to give public comment. Week after week, your actions belie your hollow claim to be the "citizen's voice in police affairs."

Sincerely,

Margaret Starbuck

Commissioners,

LAPD killed another person this weekend, 19-year-old Luis Herrera who stood on his own porch with a toy rifle as his father screamed to police that it was not a real gun. LAPD shot Luis in the chest and killed him in his own home. Luis would have been 20 years old this Monday.

LAPD continues to devastate families and communities by violently taking their loved ones and leaving trauma in their wake. The department further decimates communities by withholding or monopolizing resources that would otherwise be used to support and uplift those communities most in need. Instead LAPD spends billions of dollars on weaponry and technology to contain, surveil, occupy, and destroy.

Luis Herrera was the 13th person killed by LAPD's guns in 2022. He was 19 years old. LAPD also committed manslaughter in August against Janisha Harris and Jamarea Keyes, when chasing another vehicle through a red light. Another three people have died this year after being taken into LAPD custody.

Police Commissioners,

The "gun violence" issue is a distraction. Guns don't cause violence. People are the perpetrators of violence. So, when people commit ILLEGAL gun violence in the commission of a crime there must be serious consequences for the perpetrator of criminal violence if we take public safety seriously.

The gun is just an instrument or tool that can be used for good, as in cases of self-defense or for ill, as in criminal offenses such as robbery and murder. The perpetrator of criminal violence with a gun, or any other weapon or means is the villain, not the gun. The gun, like any other tool, can be used legally and for a righteous purpose or misused for a nefarious purpose.

Some people have guns because they feel safer with a gun, like mayoral candidate Karen Bass, who stated she felt that Los Angeles was a ten on a safety scale of ten with ten being the safest. So why did she feel the need to have two guns if she felt so safe in LA? Why did it take a burglary of her own affluent home in an exclusive neighborhood, under suspicious circumstances, to realize, what the vast majority of Angelenos feel, that Los Angeles is NOT a safe city in which to live and thrive in everyday life.! Were the guns secured in a gun safe and was there an alarm system to fortify her sense of safety at her residence? WAKE UP CALL!!!

Los Angeles has approximately a murder a day. Do you call that safe? I don't. The crime statistic numbers have been steadily rising and the public perception of safety has been steadily declining. How safe do YOU feel in LA on a scale of 1 to 10?

It is the responsibility of the Mayor, Police Commission, Police Chief and Police Dept., City Attorney and District Attorney to provide the best service possible in the area of public safety as a covenant with the people. You know, the people. The people who live, die and pay taxes here in LA. Where is the present Mayor? Where is the leadership in supporting Our LAPD in their mission to reduce the incidence and fear of crime?

Public safety is not and should not be an issue of political partisanship. It is an issue of common sense, compassion and courage to do what is needed to be done to prevent crime, investigate crime and when crime occurs, to ensure justice for the victims.

We need a Mayor who has Common sense, Compassion and Courage who will support the LAPD and law enforcement! We need former Police Commissioner Rick Caruso for a Safer LA/ He didn't need for his home to be burglarized to get the Wake Up Call that LA is experiencing a public safety crisis! He knew and knows better!

Voices for LAPD and a Safer LA For All!
