Good morning, Police Commissioners, I hope everyone is doing well. I wanted to welcome the new Police Commissioners, Rasha Shields and Dr. Erroll Southers. I would like to start with a quote from Ian Watson, "If you have to be persuaded, reminded, pressured, lied to, incentivized, coerced, bullied, socially shamed, guilt-tripped, threatened, punished and criminalized; If all of this is considered necessary to gain your compliance- You can be absolutely certain that what is being promoted is not in your best interest".

I was truly hoping the Police Commission would have given their feedback as to how each one of you applies the Core Values that are posted on your webpage. I was hoping those words would resonate with you. My suggestion for you all to read and reflect on these Core Values just fell through the cracks apparently. If you are serious about changing culture, it starts with you.

During the last Police Commission meeting on 3/21/2023 if you listened, I could not have proven the words that I have been saying for the past several months to be truer. All the speakers that bravely spoke all had one thing in common, they don't trust you. This is truly a pandemic of corruption within the City of Los Angeles leadership. Honestly, how do you realistically think anything is ever going to change when you continue down this same path week after week?

Commissioner Briggs I'm very disappointed with you. I have continued to ask, why you provided a false narrative to the public to justify extending the state of emergency when the Covid-19 trends at the time of your briefing did not match the data you provided. The truth can always be easily defended; however, your silence is deafening, and your lack of response says a lot. I will give you the benefit of doubt, maybe you don't recall the meeting that I'm referring to. You can refresh your memory and watch the Police Commission meeting on the internet. The dates that I'm referring to are 9/20/22 and 10/25/22.

Let me provide further detail below that provides dates and the current data for that time period.

On 9/2/2022, the CDC moved LA County into the low Community level for severe illness from Covid-19. Reflecting minimal stress on the hospital systems in LA County associated with Covid-19. Per the CDC many people in the U.S. have some protection, or immunity, against Covid-19. This immunity, combined with the availability of tests and treatments, has greatly reduced the risk of severe illness, hospitalizations, and death from the Covid-19 for many people.

On 9/20/2022, During agenda item #3 AB361, Commissioner Briggs advised, the state of emergency remain active because of increased Covid cases, increased hospitalizations, and death. These cases have increased from one month prior and continue to pose an imminent risk to health. Commissioner Briggs used data from the L.A. County Health Department from July 7, 2022. The CDC published updated Covid-19 data eighteen days prior to this Police Commission meeting. Commission Briggs was not providing the public with the current trends.

On October 17, 2022, Governor Newsom published a report from his official webpage, noting hospitalizations and deaths are dramatically reduced and California has the tools needed to continue fighting Covid-19. Governor Newson even added he has built up an unprecedented public health infrastructure.

On October 25, 2022, Commissioner Briggs during the Police Commission meeting read from his computer screen the same verbiage as he did on 9/20/22 to extend the state of emergency, using data from the L.A. County Health Department from July 7, 2022. As you can see from the CDC and what was posted on the official webpage of Governor Newsom there is a wide discrepancy with the verbiage Commissioner Briggs used.

If we were still in July, when Commissioner Briggs read this on 9/20/22 & 10/25/22, I would be in complete agreement with him that Covid cases were up. As you all are aware in the month of July 2022, per Chief Moore, there were a total of 405 Covid-19 positive infections within the LAPD, 323 of the 405 were fully vaccinated, meaning for the month of July, 80% of the positive cases came from the vaccinated population within the LAPD.

If we were still in August, when Commissioner Briggs read this on 9/20/22 & 10/25/22, I would still agree with him that Covid cases were up. As you all are aware in the month of August 2022, per Chief Moore there were a total of 317 Covid-19 positive infections within the LAPD, 262 of the 317 were fully vaccinated, meaning for the month of August, 83% of the positive cases came from the vaccinated population within the LAPD.

I'm not sure if the citizens of Los Angeles are aware of this. The City of Los Angeles receives money every time the state of emergency is extended. The Police Commission extended the state of emergency to continue to allow for virtual meetings under a false pretense, however City Council extended the state of emergency for profit, under a false pretense. If conditions of a state of emergency aren't met, continuing to declare a state of emergency still exists from obsolete Covid-19 data when it doesn't match the current trends is FRAUD! Inspector General where is the investigation?

On 11/22/22 during the Police Commission meeting, Commission Briggs extended the state of emergency once again under the clever disguise of agenda item #3, Teleconference meeting. This is just one example of many why there is a severe lack of public trust with you all. As all of you are aware, for November 2022, there were a total of 166 Covid-19 infections within LAPD. 140 of those infections were from the vaccinated population within the LAPD.

I want to point out an article written by Joseph Mercola that was published on March 20, 2023. In this article it points out the surge in deaths and disability that has occurred since the Covid-19 shot campaign rolled out.

Disability numbers Skyrocketed! Prior to the Covid-19 shots there were 29 to 30 million disabled people on an absolute basis, a rate that remained steady for four or five years. In 2021, a trend changed, occurring reaching a high of 33.2 million in September of 2022, with numbers trending upward. This trend of change that is happening is highly unusual.

Insurance companies that sell group life policies to large Fortune 500 corporations have seen a 40% surge in deaths. These companies thrive on selling policies to these types of companies because they hardly ever pay out on a claim. The workers at these corporations tend to be in good health, with industry data suggesting the group life policyholders have one-third the mortality rate of the general U.S. population. These death rates have historically been highly predictable among this group.

Steve Kirsch also provided insight to this article. Kirsch wrote, the data showing among the vaccinated with the Covid-19 shot aged 65 and younger, sudden death was the No.1 cause of death in 2021 and 2022. The second highest cause of death was cardiac-related death and cancer was the third. The incidence of turbo-charged cancer among the vaccinated was significant in this group and myocarditis has killed more people then Covid-19. No myocarditis deaths were seen

among unvaccinated people in the same age group.

You can also read another article titled, “Scientific and Public Health Failure” that was posted in my public comment on 2/28/23 and 3/14/23. This article was published on 2/07/23 by the Daily Caller written by Dylan Housman.

Chief Moore mentioned there are still 11 “Long Covid Cases” during the Police Commission meeting on 03/21/23. Can you please define what Long Covid Cases means? Are you referring to adverse events with the Covid-19 gene therapy shot or are you referring to what the CDC Deputy Director Tom Shimabukuro admitted to that Covid-19 vaccines are causing “Debilitating Illnesses” and “We are aware of these reports of people experiencing long-lasting health problems following Covid vaccination.” I’m not requesting the names of the LAPD personnel, just a definition as to the meaning of “Long Covid Cases”. The term “Long Covid Cases” has been used for the past several months and it’s unclear. How would one know if symptoms are from long term side effects of taking part in a clinical trial, never tested on humans before or from “Long Covid”? I would imagine it would be hard to tell since long flu wasn’t in the public consciousness via the media before.

Chief Moore or Mayor Bass would one of you be able to elaborate on the City of Los Angeles definition of being “fully vaccinated”? How many employees are up to date with Covid-19 boosters per the CDC and FDA recommendations? The reason why I ask is the CDC is showing 16.4% of the population in the United States are up to date with their Covid-19 boosters. You can view and verify this on the CDC website. Using the CDC’s 16.4% as a guide, if one applies this to the Police Commission that means only 1 out of 5 of you is up to date with their Covid-19 boosters. This would also mean that only 3 people of all the City Council plus Mayor Bass are up to date with their Covid-19 boosters. This would...

Commissioners,

Like its "critical incident" videos, LAPD's Annual Use of Force Report is an attempt by police to change the story and reality of policing in Los Angeles. In actuality, LAPD is the most murderous police agency in the US, notoriously corrupt and with a practice and culture of data manipulation and mismanagement, racist profiling, and racialized and gender-based violence.

LAPD continues to lead the nation in the number of people killed by police annually. The department also continues to protect its shooters, producing and releasing carefully scripted and edited videos of police murders and brutality, which set the police narrative months before any formal investigation. These videos are filled with misinformation and lies, and are funded through the city budget.

The tactic of selectively constructing and publishing analyses about police "use of force" - which today takes the form of LAPD's Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

As communities demanded an end to police murders, police departments including LAPD responded by performatively committing to invest in increased police "transparency," data-gathering, and reporting regarding its own "use of force." Like the increased focus on RIPA stop data, these commitments ring hollow as the community understands that none of this will lead to less racialized violence or police "use of force."

Police continue to lie in LAPD reports. Critical Incident videos show false narratives and an institutional and social culture of dehumanization and violence. LAPD has published these bloated annual reports since 2015, filled with tables that will never be referred to and are of no use to the community; the reports stuffed with descriptions of policies and procedures that police routinely ignore. In the 2021 Annual Use of Force Report we read how police are prohibited from

shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fired from a moving vehicle at Jermaine Petite, badly wounding him.

In other issues LAPD describes all the ways it claims to train cops to de-escalate and use “less lethal” force, but still in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos.

These are some of the many policies and trainings that gets presented in the Annual Use of Force Reports. These reports do not accurately report on LAPD nor do they decrease police violence. We further demand to be able to give public comment following agenda items, including an LAPD presentation. In previous years, prior to COVID-19, the community was able to provide comment after hearing more information about an agenda item. This has been eliminated so there is no opportunity for community members to speak on presentations. This must be reversed as the community is the most informed when it comes to the treatment of community members by police, and the overall actions of police.

Thank you from a concerned citizen

Kevin King

These videos are filled with misinformation and lies, and are funded through the city budget.

The tactic of selectively constructing and publishing analyses about police “use of force” - which today takes the form of LAPD’s Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

As communities demanded an end to police murders, police departments including LAPD responded by performatively committing to invest in increased police “transparency,” data-gathering, and reporting regarding its own “use of force.” Like the increased focus on RIPA stop data, these commitments ring hollow as the community understands that none of this will lead to less racialized violence or police “use of force.”

Police continue to lie in LAPD reports. Critical Incident videos show false narratives and an institutional and social culture of dehumanization and violence. LAPD has published these bloated annual reports since 2015, filled with tables that will never be referred to and are of no use to the community; the reports stuffed with descriptions of policies and procedures that police routinely ignore. In the 2021 Annual Use of Force

Report we read how police are prohibited from shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fires from a moving vehicle at Jermaine Petite, badly wounding him.

In other issues LAPD describes all the ways it claims to train cops to de-escalate and use “less lethal” force, but still in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos.

These are some of the many policies and trainings that gets presented in the Annual Use of Force Reports. These reports do not accurately report on LAPD nor do they decrease police violence. We further demand to be able to give public comment following agenda items, including an LAPD presentation. In previous years, prior to COVID-19, the community was able to provide comment after hearing more information about an agenda item. This has been eliminated so there is no opportunity for community members to speak on presentations. This must be reversed as the community is the most informed when it comes to the treatment of community members by police, and the overall actions of police.

Signed,

Cody Sloan

Dear Board of Police Commissioners and City Council Members:

As a citizen of Los Angeles District 10 I'm writing to submit public comments to the LA Police Commission meeting. I'm also cc-ing the city council members since the commission continuously fails to hold LAPD accountable and continues to not heed the majority of public comments given.

Agenda Item 5A
The LAPD's Annual Use of Force Report is a sham for a number of reasons.

- Its primary goal is to redirect your and the public's attention from the fact that whatever horrible excuses LAPD gives, it is the most murderous police agency in the nation. LAPD continues to protect its killer cops. It releases carefully scripted and edited videos of police murders and brutality, which set the police narrative months before any formal investigation. These videos are filled with misinformation and lies, and are funded through the city budget.
- Police continue to lie in LAPD reports, giving false narratives and talking all about policies that are continuously left ignored through obvious infringements of policy that coincidentally are not labeled as such in the next year's reports. In the 2021 Annual Use of Force Report we read how police are prohibited from shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fires from a moving vehicle at Jermaine Petite, badly wounding him. Instead of taking responsibility for this obvious infringement of policy, LAPD just gives more reason why Hayhoe was right in shooting at someone.
- LAPD's reports talk all about their de-escalation training. Apparently their de-escalation training doesn't work-- in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos. The amount of training LAPD gives doesn't matter - they still keep killing people.
- The tactic of selectively constructing and publishing analyses about police "use of force" - which today takes the form of LAPD's Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

General Public Comment: General Public Comment Limitations
Remove the 45-minute limitation and re-arrange meeting order so that participants may comment on items being voted on by the Board after hearing any discussion and presentation.

Sincerely,
Sarah Bowers
District 10

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Commissioners,

Like its “critical incident” videos, LAPD’s Annual Use of Force Report is an attempt by police to change the story and reality of policing in Los Angeles. In actuality, LAPD is the most murderous police agency in the US, notoriously corrupt and with a practice and culture of data manipulation and mismanagement, racist profiling, and racialized and gender-based violence.

LAPD continues to lead the nation in the number of people killed by police annually. The department also continues to protect its shooters, producing and releasing carefully scripted and edited videos of police murders and brutality, which set the police narrative months before any formal investigation. These videos are filled with misinformation and lies, and are funded through the city budget.

The tactic of selectively constructing and publishing analyses about police “use of force” - which today takes the form of LAPD’s Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

As communities demanded an end to police murders, police departments including LAPD responded by performatively committing to invest in increased police “transparency,” data-gathering, and reporting regarding its own “use of force.” Like the increased focus on RIPA stop data, these commitments ring hollow as the community understands that none of this will lead to less racialized violence or police “use of force.”

Police continue to lie in LAPD reports. Critical Incident videos show false narratives and an institutional and social culture of dehumanization and violence. LAPD has published these bloated annual reports since 2015, filled with tables that will never be referred to and are of no use to the community; the reports stuffed with descriptions of policies and procedures that police routinely ignore. In the 2021 Annual Use of Force

Report we read how police are prohibited from shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fires from a moving vehicle at Jermaine Petite, badly wounding him.

In other issues LAPD describes all the ways it claims to train cops to de-escalate and use “less lethal” force, but still in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos.

These are some of the many policies and trainings that gets presented in the Annual Use of Force Reports. These reports do not accurately report on LAPD nor do they decrease police violence. We further demand to be able to give public comment following agenda items, including an LAPD presentation. In previous years, prior to COVID-19, the community was able to provide comment after hearing more information about an agenda item. This has been eliminated so there is no opportunity for community members to speak on presentations. This must be reversed as the community is the most informed when it comes to the treatment of community members by police, and the overall actions of police.

Signed,
Annedell Walker

In actuality, LAPD is the most murderous police agency in the US, notoriously corrupt and with a practice and culture of data manipulation and mismanagement, racist profiling, and racialized and gender-based violence.

LAPD continues to lead the nation in the number of people killed by police annually. The department also continues to protect its shooters, producing and releasing carefully scripted and edited videos of police murders and brutality, which set the police narrative months before any formal investigation. These videos are filled with misinformation and lies, and are funded through the city budget.

The tactic of selectively constructing and publishing analyses about police “use of force” - which today takes the form of LAPD’s Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

As communities demanded an end to police murders, police departments including LAPD responded by performatively committing to invest in increased police “transparency,” data-gathering, and reporting regarding its own “use of force.” Like the increased focus on RIPA stop data, these commitments ring hollow as the community understands that none of this will lead to less racialized violence or police “use of force.”

Police continue to lie in LAPD reports. Critical Incident videos show false narratives and an institutional and social culture of dehumanization and violence. LAPD has published these bloated annual reports since 2015, filled with tables that will never be referred to and are of no use to the community; the reports stuffed with descriptions of policies and procedures that police routinely ignore. In the 2021 Annual Use of Force

Report we read how police are prohibited from shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fires from a moving vehicle at Jermaine Petite, badly wounding him.

In other issues LAPD describes all the ways it claims to train cops to de-escalate and use “less lethal” force, but still in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos.

These are some of the many policies and trainings that gets presented in the Annual Use of Force Reports. These reports do not accurately report on LAPD nor do they decrease police violence. We further demand to be able to give public comment following agenda items, including an LAPD presentation. In previous years, prior to COVID-19, the community was able to provide comment after hearing more information about an agenda item. This has been eliminated so there is no opportunity for community members to speak on presentations. This must be reversed as the community is the most informed when it comes to the treatment of community members by police, and the overall actions of police.

Signed,
J.Stephen Brantley

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Commissioners,

Please stop working with the LAPD to cover-up its deadly practices and disregard for the safety of our community. Like its “critical incident” videos, LAPD’s Annual Use of Force Report is an attempt by police to change the story and reality of policing in Los Angeles. In actuality, LAPD is the most murderous police agency in the US, notoriously corrupt and with a practice and culture of data manipulation and mismanagement, racist profiling, and racialized and gender-based violence.

LAPD continues to lead the nation in the number of people killed by police annually. The department also continues to protect its shooters, producing and releasing carefully scripted and edited videos of police murders and brutality, which set the police narrative months before any formal investigation. These videos are filled with misinformation and lies, and are funded through the city budget.

The tactic of selectively constructing and publishing analyses about police “use of force” - which today takes the form of LAPD’s Annual Use of Force Report, on the agenda today - emerged in 2014 as a state and police response to nationwide uprisings and outrage over the murders of Ezell Ford and Mike Brown, two Black youth who were only among the most recent to have been murdered by police.

As communities demanded an end to police murders, police departments including LAPD responded by performatively committing to invest in increased police “transparency,” data-gathering, and reporting regarding its own “use of force.” Like the increased focus on RIPA stop data, these commitments ring hollow as the community understands that none of this will lead to less racialized violence or police “use of force.”

Police continue to lie in LAPD reports. Critical Incident videos show false narratives and an institutional and social culture of dehumanization and violence. LAPD has published these bloated annual reports since

2015, filled with tables that will never be referred to and are of no use to the community; the reports stuffed with descriptions of policies and procedures that police routinely ignore. In the 2021 Annual Use of Force Report we read how police are prohibited from shooting from a moving vehicle - in 2022 LAPD Sergeant Brett Hayhoe fires from a moving vehicle at Jermaine Petite, badly wounding him.

In other issues LAPD describes all the ways it claims to train cops to de-escalate and use “less lethal” force, but still in 2021, 2022, and present day, LAPD continues to respond to calls for help from people in crisis and fatally shoot them, as they did with Margarito Lopez Jr. and Jesus Alan Castellanos.

These are some of the many policies and trainings that gets presented in the Annual Use of Force Reports. These reports do not accurately report on LAPD nor do they decrease police violence. We further demand to be able to give public comment following agenda items, including an LAPD presentation. 04/04/2023

Attention: Mayor Karen Bass, Councilmember Eunisses Hernandez, Councilmember Paul Krekorian, Councilmember Bob Blumenfield, Councilmember Monica Rodriguez, Councilmember Marqueece Harris-Dawson, Councilmember Curren D. Price Jr., Councilmember Heather Hutt, Councilmember Traci Park, Councilmember John Lee, Councilmember Tim McOsker, Councilmember Hugo Soto-Martinez, Councilmember Kevin de Leon, Councilmember John Lee.

Police Commissioners: William J. Briggs, Maria Lou Calanche, Steve Soboroff, Rasha Shields, Dr. Erroll Southers

Good morning, Police Commissioners, I hope everyone is doing well. I wanted to welcome the new Police Commissioners, Rasha Shields and Dr. Erroll Southers. I would like to start with a quote from Ian Watson, **"If you have to be persuaded, reminded, pressured, lied to, incentivized, coerced, bullied, socially shamed, guilt-tripped, threatened, punished and criminalized; If all of this is considered necessary to gain your compliance- You can be absolutely certain that what is being promoted is not in your best interest".**

I was truly hoping the Police Commission would have given their feedback as to how each one of you applies the Core Values that are posted on your webpage. I was hoping those words would resonate with you. My suggestion for you all to read and reflect on these Core Values just fell through the cracks apparently. If you are serious about changing culture, it starts with you.

During the last Police Commission meeting on 3/21/2023 if you listened, I could not have proven the words that I have been saying for the past several months to be truer. All the speakers that bravely spoke all had one thing in common, they don't trust you. This is truly a pandemic of corruption within the City of Los Angeles leadership. Honestly, how do you realistically think anything is ever going to change when you continue down this same path week after week?

Commissioner Briggs I'm very disappointed with you. I have continued to ask, why you provided a false narrative to the public to justify extending the state of emergency when the Covid-19 trends at the time of

your briefing did not match the data you provided. The truth can always be easily defended; however, your silence is deafening, and your lack of response says a lot. I will give you the benefit of the doubt; maybe you don't recall the meeting that I'm referring to. You can watch the Police Commission meetings on the internet. The dates that I'm referring to are 9/20/22 and 10/25/22.

I want to point out an article written by Joseph Mercola that was published on March 20, 2023. In this article it points out the surge in deaths and disability that has occurred since the Covid-19 shot campaign rolled out.

Disability numbers Skyrocketed! Prior to the Covid-19 shots there were 29 to 30 million disabled people on an absolute basis, a rate that remained steady for four or five years. In 2021, a trend changed. Disabilities reached a high of 33.2 million in September of 2022, with numbers trending upward. This trend of change that is happening is highly unusual.

Insurance companies that sell group life policies to large Fortune 500 corporations have seen a 40% surge in deaths. These companies thrive on selling policies to these types of companies because they hardly ever pay out on a claim. The workers at these corporations tend to be in good health, with industry data suggesting the group life policyholders have one-third the mortality rate of the general U.S. population. These death rates have historically been highly predictable among this group.

Steve Kirsch also provided insight to this article. Kirsch wrote, the data showing among the vaccinated with the Covid-19 shot aged 65 and younger, sudden death was the No.1 cause of death in 2021 and 2022. The second highest cause of death was cardiac-related death and cancer was the third. The incidence of turbo-charged cancer among the vaccinated was significant in this group and myocarditis has killed more people than Covid-19. No myocarditis deaths were seen among unvaccinated people in the same age group.

You can also read *another* article titled, ***"Scientific and Public Health Failure"*** *that was posted in my public comment on 2/28/23 and 3/14/23. This article was published on 2/07/23 by the Daily Caller written by Dylan Housman.*

Chief Moore mentioned there are still 11 "Long Covid Cases" during the Police Commission meeting on 03/21/23. Can you please define what Long Covid Cases means? Are you referring to adverse events with the Covid-19 gene therapy shot or are you referring to what *the* ***CDC Deputy Director Tom Shimabukuro*** *admitted that Covid-19 vaccines are* ***causing "Debilitating Illnesses" and "We are aware of these reports of people experiencing long-lasting health problems following Covid vaccination."*** I'm not requesting the names of the LAPD personnel, just a definition as to the meaning of "Long Covid Cases". The term "Long Covid Cases" has been used for the past several months and it's unclear. How would one know if symptoms are from long term side effects of taking part in a clinical trial, never tested on humans before or from "Long Covid"? I would imagine it would be hard to tell since long flu wasn't in the public consciousness via the media before.

Chief Moore or Mayor Bass would one of you be able to elaborate on the City of Los Angeles definition of being "fully vaccinated"? How many employees are up to date with Covid-19 boosters per the CDC and FDA recommendations? The reason why I ask is the **CDC is showing 16.5% of the population in the United States are up to date with their Covid-19 boosters. You can view and verify this on the CDC website.** Using the CDC's 16.5% as a guide, if one applies this to the Police Commission that means only 1 out of 5 of you is up to date with their Covid-19 boosters. This would also mean that only 3 people of all the City Council plus Mayor Bass are up to date with their Covid-19 boosters. **This would also mean we should expect 1,507 LAPD employees to be "fully vaccinated". However, 84% has been cited several times as the percentage of "fully**

vaccinated" LAPD employees, which would be 7,673 employees. While one cannot simply extrapolate national numbers and expect them to precisely reflect a city police department's number, the wide discrepancy between the two figures is too large to ignore. Did the City of Los Angeles consult with a medical doctor or scientist to defer from the FDA and CDC recommendations about being current with Covid-19 boosters? If so, with whom? *I do remember the City of Los Angeles promising us that you would be guided by the CDC and FDA, following the science throughout this pandemic. Did something change?*

Chief Moore provided Covid-19 figures on 3/21/23, there were a total of **5 positive infections within the LAPD**. **4 of the 5 infections were previously vaccinated employees** and **1 of the 5 infections was an unvaccinated employee**. As of March 21, 2023, there have been a **total of 353 Covid-19 infections** since the beginning of this year. **298 of the 353 have been previously vaccinated employees and 55 of the 353 have been unvaccinated employees**.

The public would like to know what the implementation of the Covid-19 mandate has done for public safety. We would like to know your opinion on the effectiveness of establishing mandatory Covid-19 shots, shutting down local businesses and schools throughout this pandemic. The data that you have provided for the past few years is a clear indicator. The data from around the world is also showing a distinct similar pattern as well. We would like to hear from your perspective though. Please be willing and able to provide your credible sources such as clinical studies and recently published medical journals. As I have stated in the past, if you have questions or would like to view my sources, just ask. This certainly gives the appearance that this mandate in the name of public safety was nothing more than a financial incentive for the City of Los Angeles that innocent people unknowingly have paid the price for.

Speaking of a financial incentive, Moderna's CEO Stephane Bancel admitted Moderna paid Dr. Fauci's NIH $400 million dollars in royalties for a product the government mandated. I'm curious to know whether you feel this creates a conflict of interest or not. These are the same people deciding on a policy about the number of times people need to take a vaccine to also be making money the more times people take a vaccine. Seems rather suspicious if you ask me but I'm curious as to what you think.

Here are the most recent numbers from the CDC and local media.

The latest census from 2021 show 9.83 million people currently residing in L.A. County.

Per California census as of 2021 California's population is 39.24 million.

March 30, 2023, per the CDC

Case rate per 100,000 population	**36.36 or 0.03636%**
New Covid-19 admissions per 100,000 population	**3.7 or 0.0037%**
% Staffed inpatient beds in use by patients with confirmed Covid-19	**2.3 %**

03/30/2023, My News L.A. did not provide a breakdown of coronavirus new cases, hospitalizations or "virus-related" deaths.

March 23, 2023, per the CDC

Case rate per 100,000 population **44.13 or 0.04413%**

New Covid-19 admissions per 100,000 population **4.5 or 0.0045%**

% Staffed inpatient beds in use by patients with confirmed Covid-19 **2.6%**

03/23/2023, My News L.A. reported that coronavirus numbers are on a downward trend. **435 covid-positive patients are in L.A. County hospitals**. Of those patients 40 were being treated inside the ICU. Some patients were admitted for other medical reasons and only learned they had Covid after they took a mandatory Covid-19 test. The **statewide total of Covid-positive patients in hospitals is 1,892.** L.A. County Department of Health reported a total of **537 new coronavirus cases** and **12 "virus-related deaths". It was not distinguished what these virus-related deaths were (Influenza, RSV or Covid-19)**. Health Officials have stated that most of the deaths from Covid-19 are elderly or have underlying health conditions such as diabetes, heart disease or hypertension.

Case rate per 9.83 million population **537 or 0.00546%**

New Covid-19 admissions per 9.83 million **435 or 0.0044%**

Death Rate per 9.83 million **12 or 0.00001221%**

State Covid-19 Admissions per 39.24 million population **1,892 or 0.0048%**

March 16, 2023, per the CDC

Case rate per 100,000 population **60.54 or 0.06054%**

New Covid-19 admissions per 100,000 population **5.4 or 0.0054%**

% Staffed inpatient beds in use by patients with confirmed Covid-19 **3.1%**

March 9, 2023, per the CDC

Case rate per 100,000 population **62.73 or 0.06273%**

New Covid-19 admissions per 100,000 population **5.9 or 0.0059%**

% Staffed inpatient beds in use by patients with confirmed Covid-19 **3.7%**

March 2, 2023, per the CDC

Case rate per 100,000 population **75.54 or 0.07554%**

New Covid-19 admissions per 100,000 population **6.9 or 0.0069%**

% Staffed inpatient beds in use by patients with confirmed Covid-19 3.8%

February 23, 2023, per the CDC

Case rate per 100,000 population 64.71 or 0.06471%

New Covid-19 admissions per 100,000 population 7 or 0.007%

% Staffed inpatient beds in use by patients with confirmed Covid-19 3.9%

February 16, 2023, per the CDC

Case rate per 100,000 population 72.02 or 0.07202%

New Covid-19 admissions per 100,000 population 7.5 or 0.0075%

% Staffed inpatient beds in use by patients with confirmed Covid-19 3.9%

February 9, 2023, per the CDC

Case rate per 100,000 population 76.69 or 0.07669%

New Covid-19 admissions per 100,000 population 7.0 or 0.007%

% Staffed inpatient beds in use by patients with confirmed Covid-19 4.0%

February 2, 2023, per the CDC

Case rate per 100,000 population 65.79 or 0.06579%

New Covid-19 admissions per 100,000 population 7.0 or 0.007%

% Staffed inpatient beds in use by patients with confirmed Covid-19 4.0%

January 26, 2023, per the CDC

Case rate per 100,000 population 73.07 or 0.07307%

New Covid-19 admissions per 100,000 population 7.2 or 0.0072%

% Staffed inpatient beds in use by patients with confirmed Covid-19 4.6%

January 19, 2023, per the CDC

Case rate per 100,000 population **93.29 or 0.09329%**

New Covid-19 admissions per 100,000 population **9.5 or 0.0095%**

% Staffed inpatient beds in use by patients with confirmed Covid-19 **5.8%**

January 12, 2023, per the CDC

Local Media Coverage of Covid-19

The latest census from 2021 show 9.83 million people currently residing in L.A. County.

Per California census as of 2021 California's population is 39.24 million.

03/16/2023, My News L.A. reported there was **13 Covid-19-related deaths** most of which were elderly or had an underlying health condition such as diabetes, heart disease or hypertension. **643 new Covid-19 infections** were reported, and **487 patients were admitted to L.A. County hospitals,** of those reported patients 55 were being treated inside the ICU. My News L.A. reported that some of these patients were initially treated for other medical reasons and later discovered they tested positive for Covid-19. I would be curious to compare the admitted Covid-19 patients using **Hospitalizations with Covid as a primary cause**, **Hospitalizations with Covid as a contributing cause** and **Hospitalizations with incidental Covid** and comparing to the figures that My News LA published in this article.

My News LA can you inform the public know who your "Contributing Editor" for this article is? A contributing editor is a person who has served as some kind of consultant to the article preparation but is not responsible for the articles final content.

Case rate per 9.83 million population	**643 or 0.00654%**
New Covid-19 admissions per 9.83 million	**487or 0.0049%**
Death Rate per 9.83 million	**13 or 0.0001322%**

* **03/09/2023, My News L.A.** reported that L.A. County reported **901 new Covid-19 infections.** My News L.A. wrote according to state figures, there were **645 Covid-positive patients in L.A. County hospitals.** Of those 645 Covid-positive patients 62 were being treated in the ICU. My News L.A. reported there were **11 "Virus related" deaths. It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19).** Perhaps local media sources can publish Covid-19 reports with data that contain **Hospitalizations with Covid as a primary cause**, **Hospitalizations with Covid as a contributing cause** and **Hospitalizations with incidental Covid**.

Case rate per 9.83 million population	**901 or 0.00916%**
New Covid-19 admissions per 9.83 million	**645 or 0.0065%**
Death Rate per 9.83 million	**11 or 0.0001119%**

* **03/02/2023, My News L.A.** reported that **882 new Covid-19 infections** were reported in L.A. County along with **15 "Virus related" deaths. It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19).** Perhaps local media sources can publish Covid-19 reports with data that contain **Hospitalizations with Covid as a primary cause**, **Hospitalizations with Covid as a contributing cause** and **Hospitalizations with incidental Covid**. According to state figures, there were **633 Covid-positive patients in L.A. County hospitals**.

Case rate per 9.83 million population	**882 or 0.00897%**
New Covid-19 admissions per 9.83 million	**633 or 0.0064%**
Death Rate per 9.83 million	**15 or 0.0001526%**

02/24/2023, My News L.A. reported 18 new Covid-19 deaths and most people who die with Covid-19 are elderly or have underlying health conditions such as diabetes, heart disease or hypertension. State figures show there show there were **726 Covid-positive patients in L.A. County hospitals, 71 of those were being treated in the ICU.** My News L.A. reported that some of those 726 admitted patients were admitted for other medical reasons and later discovered that they have tested positive for Covid-19. Being hospitalized for

another medical reason, later learning the patient is Covid-positive is called Incidental Covid. The L.A. County public health department reported there were **1,753 new Covid-19 infections on Thursday.**

Case rate per 9.83 million population 1,753 or 0.01783%

New Covid-19 admissions per 9.83 million 726 or 0.0073%

Death Rate per 9.83 million 18 or 0.0001831%

02/17/2023, My News L.A. reported a slight uptick with **699 Covid-19 positive patients admitted to L.A. County hospitals**, 85 of those were being treated in the ICU. My News L.A. reported **1,144 new Covid infections reported in L.A. County**. **The county Department of public Health reported 20 new virus-related deaths on Thursday. It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19).**

Case rate per 9.83 million population 1,144 or 0.01163%

New Covid-19 admissions per 9.83 million 699 or 0.0071%

Death Rate per 9.83 million 20 or 0.0002035%

02/14/2023, My News L.A. reported that there were **2,333 new Covid-19** infections from a three-day period in L.A. County. 1,173 infections for Saturday, 786 on Sunday and 388 on Monday. The correct number is **2,347 new Covid-19 Infections not 2,333.** My News L.A. reported **45 new virus-related deaths. It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19). This seems to be the trend of local news media sources to lump all virus-related deaths into one category and not define which virus caused death.** My News L.A. reported that there were **697 Covid-19 patients admitted into L.A. County hospitals and 69 of those were being treated in the ICU.**

Case rate per 9.83 million population 2,347 or 0.02387%

New Covid-19 admissions per 9.83 million 697 or 0.0071%

Death Rate per 9.83 million 45 or 0.0004578%

02/08/2023, My New L.A. L.A. County health officials reported **1,103 new Covid-19** infections along with **14 more virus-related deaths**, it was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19). My New L.A. stated the majority of those who die with Covid-19 are elderly or have underlying health conditions such as diabetes, heart disease or hypertension. According to state figures, there were **692 Covid-positive patients in L.A. County hospitals**, 83 of those were being treated in the ICU.

Case rate per 9.83 million population 1,103 or 0.01122%

New Covid-19 admissions per 9.83 million 692 or 0.0070%

Death Rate per 9.83 million 14 or 0.0001424%

*** 04/09/22, Alphanews.org** published an article titled, **"Who died from Covid-19 in Minnesota".** I understand that this article is not in chronological order. What makes this article fit into place is this article is now suddenly aligning with what the CDC and the L.A. County Health Dept are currently stating. There was a study based on 10,903 Covid-19 death certificates. The **study found that 291 of the 10,903 were Covid-19 deaths with no comorbidity listed.** Feel free to read the article for yourself and make your own decision. It is quite clear that overcounting deaths and misclassifications have been occurring since the beginning of Covid-19.

01/30/2023, NBC Los Angeles reported that the World Health Organizations Emergency Committee has mentioned that the Covid-19 virus remains a threat to millions of people around the world but is reaching a "tipping point". Tedros Adhanom Ghebreyesus, Director-General of the W.H.O. said in the **past 8 weeks** there have been **more than 170,000 deaths from Covid-19 and those are just the reported deaths as the W.H.O. knows the real number is higher.**

01/30/2023, The Epoch Times reported that the CDC acknowledges overcounting Covid-19 Hospitalizations. The CDC indicators vastly inflate the present risk to communities they include ALL PATIENTS with positive Covid-19 cases, regardless of whether the hospitalization relates to or is caused by Covid-19. These metrics have resulted in, and will continue to result in, misinformed policy decisions at the state and local level.

*** 01/26/2023**, **Fox 11 news** reported that L.A. County Department of Public Health, has **overcounted deaths related to Covid-19 by as much as 20%.** Fox 11 news also interviewed Dr. Michael Daignault a board-certified E.R. Doctor. *Fox 11 news asked Dr. Daignault, "When was the last time you personally saw, what you would consider a Covid death in the hospital?"* **Dr. Daignault replied, "It's been a while, it's been over a year and probably since last winter."** *Fox 11 news further inquired with Dr. Daignault if he believes that Covid is still a public health emergency?* **Dr. Daignault replied, "As far as the strain on hospitals, No I wouldn't classify Covid as an emergency anymore. Were back to business as usual, and we have been in the E.R. and hospitals for the last year. We are not overstressed with Covid anymore."**

01/24/2023, NBC Los Angeles news reported the County Department of Public Health reported a total of **2,264 new Covid-19 Infections**. Los Angeles Counted reported **46** Covid-19 related deaths. NBC Los Angeles reported that Virus-related hospitalizations numbers were not immediately available but as of Saturday there were **830 Covid-positive patients in L.A. County hospitals, 95 of those being treated in the ICU.**

Case rate per 9.83 million population	**2,264 or 0.02303%**
New Covid-19 admissions per 9.83 million	**830 or 0.0084%**
Death Rate per 9.83 million	**46 or 0.000468%**

*** 01/19/2023, ABC Channel 7** reported that Covid-19 rates Thursday, as Los Angeles County dropped from the federal government's "MEDIUM" category to the governments **"LOW" category for the coronavirus activity**. ABC 7 reported that there was **1,502 new Covid-19 infections** and **31 new "virus-related" deaths. It**

was not distinguished what these virus-related were (Influenza, RSV or Covid-19). According to state figures, **918 Covid-positive patients were admitted into L.A. County hospitals**, 92 of the 918 are being treated inside the ICU.

Case rate per 9.83 million population 1,502 or 0.01527%

New Covid-19 admissions per 9.83 million 918 or 0.0093%

Death Rate per 9.83 million 31 or 0.0003154%

*** 01/18/2023**, **My News L.A.** reported that there were **3,217 new Covid-19 infections** in L.A. County. The number of Covid-positive **patients admitted into L.A. County hospitals was 1,024 of these admitted patients 125 were being treated in the ICU**. My News LA reported that **L.A. County reported 63 Covid-related deaths.** L.A. County Health Director Barbara Ferrer presented numbers that showed hospitalizations and death are increasingly higher with the elderly, 80 years and older. The death rate with this range is five times higher than for people aged 65-79. Ferrer further added, most people that die from Covid-19 are elderly or have an underlying health condition.

Case rate per 9.83 million population 3,217 or 0.03272%

New Covid-19 admissions per 9.83 million 1,024 or 0.0104%

Death Rate per 9.83 million 63 or 0.0006409%

01/12/2023, **My News L.A.** reported that there were **2,616 new Covid-19 infections** in L.A. County. The number of Covid-positive patients admitted into L.A. County hospitals was **1,128** of these patients 139 were being treated at the ICU. My News L.A. has indicated that roughly 40% of the Covid-19 positive patients were admitted to hospitals specifically for virus-related reasons, while the others were admitted for other medical reasons and later tested positive. This breaks down to out of the 1,128 patients, **451 were admitted for Covid-19** and **677 of the 1,128 were admitted for other medical reasons**, later testing positive at the hospital. My News L.A. reported **30 new "virus-related deaths**. **It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19).**

Case rate per 9.83 million population 2,616 or 0.02661%

New Covid-19 admissions per 9.83 million 1,128 or 0.0114%

Death Rate per 9.83 million 30 or 0.0003052%

01/05/2023, **My News L.A.** reported that Los Angeles County logged **2,138 new Covid-19 cases** and **26 additional "virus-related" deaths. It was not distinguished what these virus-related deaths were (Influenza, RSV or Covid-19)**. My News L.A. reported that **1,262 were hospitalized in L.A. County hospitals** as of Wednesday.

Case rate per 9.83 million population 2,138 or 0.02174%

New Covid-19 admissions per 9.83 million 1,262 or 0.0128%

Death Rate per 9.83 million 26 or 0.0002645%

12/27/2022, Per **My News L.A.** that L.A. County has reported **6,994 new covid-19 cases over the holiday weekend**. My News L.A. reported that there were **1,220 Covid positive patients that were in L.A. County hospitals, with 153 being treated inside the ICU**.

My News L.A. reported that Health officials have estimated that roughly 40% of the patients with the virus were admitted for actual Covid-related ailments, while others were hospitalized for other reasons, later testing positive for Covid-19 while being at the hospital. This breaks down to out of the 1,220 patients admitted in L.A County hospitals, **488** were admitted for Covid-related ailments and **732 admitted for other medical reasons**. L.A. County reported **39 "more virus-related deaths". It was not distinguished what these virus-related deaths were (RSV, Influenza or Covid-19).**

Case rate per 9.83 million population 6,994 or 0.07114%

New Covid-19 admissions per 9.83 million 1,220 or 0.0124%

Death Rate per 9.83 million 39 or 0.0003967%

12/22/2022, My News L.A. reported the number of **Covid-19 positive patients in L.A. County hospitals is at 1,274**. Of those patients 152 were being treated in the ICU. **The number of new infections is at 3,080**. My News L.A. reported there were **23 "virus related" deaths. It was not distinguished what these virus-related deaths were (Influenza, RSV or Covid-19).**

My News L.A. reported that Health Officials have estimated that roughly 40% of the patients with the virus were admitted for actual Covid-19 related ailments, while others were hospitalized for other reasons, learning after admission to the hospital being infected with Covid-19. **This breaks down to of the 1,274 Covid-19 admissions, 510 were admitted for Covid-19 aliments and 764 were admitted for other reasons**, later learning they tested positive for Covid-19.

Case rate per 9.83 million population 3,080 or 0.03133%

New Covid-19 admissions per 9.83 million 1,274 or 0.0129%

Death Rate per 9.83 million 23 or 0.000234%

12/15/2022, My News L.A. reported the number of Covid-19 positive patients in L.A. County hospitals is at **1,304**. My News L.A. reported that 135 were being treated in the ICU. The County reported **4,211** new infections. My News L.A. reported another **16 "virus related" deaths, it was not distinguished what these virus-related deaths were (Influenza, RSV or Covid-19).**

Case rate per 9.83 million population 4,211 or 0.04283%

New Covid-19 admissions per 9.83 million 1,304 or 0.0132%

Death Rate per 9.83 million 16 or 0.0001628%

12/09/2022, The L.A. Times reported that Influenza, RSV and Covid-19 cases are all rising. Drug makers and retailers say its soaring demand, that's leading to empty shelfs at pharmacies.

Influenza cases in California have risen to levels that haven't been seen in years. The CDC stated that seasonal Influenza activity is high and continuing to increase across the country.

The L.A. County Department of Public Health has seen a significant increase in the percentage of specimens that have tested positive for Influenza.

12/4/2022, CBS L.A. reported that experts say the combination of Influenza, RSV and Covid-19 are putting an enormous strain on hospitals. Per the CDC Influenza levels are off the chart in California with Los Angeles and Southern California leading the State. According to the experts, 25% of the people that tested for Influenza in Los Angeles have tested positive for Influenza.

Even with viruses on the rise, one expert says that reinstating the mask mandate should be a last resort. "I think there is very little political appetite to do this and were going to try to not do this as much as possible for the holiday," said Dr. Peter Chin Hong, a UCSF infectious disease specialist.

12/3/2022, Fox 11 News reported the number of Coronavirus patients in L.A. County hospitals is at **1,205**. Of those 1,205 patients **123 patients were being treated in the ICU** which is down from 131 the previous day. Health Officials have previously stated that roughly 40% of the patients were admitted for Covid-19 related issues while the rest were admitted for other medical reasons but tested positive while at the hospital.

This works out to be out of the 1,205 Covid-19 positive patients **482 were admitted for Covid-19 related issues** and **723 of the 1,205 patients were admitted for other medical reasons** and later tested positive for Covid-19 while already being admitted into the hospital. Fox 11 News reported a total of 4,744 new Covid-19 cases.

Case rate per 9.83 million population 4,744 or 0.04826%

New Covid-19 admissions per 9.83 million 1,205 or 0.0122%

12/01/2022, **My News L.A.** reported there were **4,353 new Covid-19 cases** reported in L.A. County. L.A. County reported **1,132 new positive Covid-19 patients that were admitted** into the County hospitals, **122 of the 1,132 being treated in the ICU**. Health Officials have previously stated that roughly 40% of the virus patients were admitted to hospitals for Covid-19 related issues, while the rest were admitted for other medical reasons later testing positive for Covid while already being admitted. This breaks down to **453 out of 1,132 are admitted for Covid-19 related issues** while **679 of the 1,132 were admitted for other medical reasons**, later testing positive for Covid-19 while already being admitted. The Los Angeles Department of Health also reported **10 additional deaths associated with Covid-19.**

Case rate per 9.83 million population 4,353 or 0.04428%

New Covid-19 admissions per 9.83 million 1,132 or 0.0115%

Death Rate per 9.83 million 10 or 0.0001017%

11/28/2022, **My News L.A.** reported there were **5,244 new cases** and **21 additional "virus related" deaths. My News L.A. did not distinguish what these "virus-related" deaths were (Influenza, RSV, Covid-19).**

822 Covid-19 positive patients were reported in L.A. County hospitals, 96 of the 822 were admitted into the ICU, which was down from 101 the previous day. My News L.A. reported that Health Officials have said previously that roughly 40% of the virus patients were admitted to the hospital for Covid-19 related issues, while the rest were admitted for other reasons but tested positive for Covid-19 while at the hospital. **329 of the 822 were admitted for Covid-19 related issues**, while **493 of the 822 were admitted for other medical reasons**, later testing positive for Covid-19 while at the hospital.

Case rate per 9.83 million population 5,244 or 0.05334%

New Covid-19 admissions per 9.83 million 822 or 0.0083%

Death Rate per 9.83 million 21 or 0.0002136%

11/23/2022, My News L.A. reported the number of new positive **Covid-19 patients being treated in L.A. County hospitals is 727**. My News L.A. reported the number of statewide Covid positive patients is **2,581**.

The County Department of Public Health reported per My News L.A. **1,661 new Covid-19 infections** and the **County reported 7 new "virus" related deaths**. My News L.A. did not **distinguish what these new "virus" related deaths were (Covid-19, RSV or Influenza).** Health Officials have said, roughly 40% of the virus patients were admitted for Covid-related issues, while the rest were admitted for other reasons later testing positive for Covid-19 at the hospital. This breaks down to **291 out of the 727 were admitted for Covid-19 related issues and 436 of the 727 were admitted for other medical reasons,** later testing positive while already being admitted at the hospital.

Case rate per 9.83 million population 1,661 or 0.01689%

New Covid-19 admissions per 9.83 million 727 or 0.0073%

Death Rate per 9.83 million 7 or 0.0000712%

State Covid-19 Admissions per 39.24 million population 2,581 or 0.0066%

11/20/2022, **My News L.A.** reported that the number of positive Covid-19 cases inside L.A. County Hospitals has increased by (4) bringing the number to **670.** The latest figures come as local Health Officials are reporting **2,200 new cases** and **8 "Virus-related" deaths**. It wasn't distinguished what these "virus-related" deaths were (Influenza, RSV or Covid-19).

Case rate per 9.83 million population 2,200 or 0.02238%

New Covid-19 admissions per 9.83 million 670 or 0.0068%

Death Rate per 9.83 million 8 or 0.0000814%

11/17/2022, **CBS L.A.** news reported, County Health Officials, "Strongly recommending" indoor masking with Covid-19 cases on the rise. **1,949 new infections were reported but did not distinguish what these infections were. (Influenza, RSV or Covid-19 infections?)**. The number of Covid-19 positive patients in County

hospitals **rose to 648**. Per CBS LA news, roughly **40% of those patients are admitted because of Covid-19 infections**, while the **rest were admitted for other medical reasons**, later testing positive for Covid-19 while already admitted. That breaks down to, 648 patients admitted to County hospitals, **259 of the 648 were admitted because of Covid-19** infections and **389 of the 648 patients were admitted to the hospital for other medical reasons,** later testing positive for Covid-19.

Case rate per 9.83 million population **1,949 or 0.01982%**

New Covid-19 admissions per 9.83 million population **648 or 0.0066%**

11/16/2022, **My News L.A**. reported, the number of Covid-19 positive cases in L.A. County hospitals continued to rise, according to the latest data. **552 Covid-19 positive patients have been hospitalized**. **75 of the 552** were being treated in the ICU. **Health officials have said previously that roughly 40% of the patients were admitted for Covid-19 related issues, while the rest were admitted for other reasons but later tested positive at the hospital**. This breaks down to **221 of the 552** were **admitted for Covid-19 related issues**, and **331** of the **552 were admitted into the hospital for other reasons**, later testing positive for Covid-19. L.A. County reported **1,532 Covid-19 positives cases** and **10 reported Covid-19 deaths.**

Case rate per 9.83 million population **1,532 or 0.01558%**

New Covid-19 admissions per 9.83 million population **552 or 0.0056%**

Death rate per 9.83 million population **10 or 0.0001017%**

*** 11/13/2022, Alix Martichoux from KTLA news,** reported, **2022 Flu season is off to an early start this year**. The **CDC has listed California as rating high for Flu infections**. **Hospitalizations rates for influenza haven't been this high, this early since 2009 Swine Flu pandemic.** KTLA reported there is an **estimate of 1300 Flu deaths in L.A. County**. **Flu activity has spiked over the past month**.

Influenza deaths estimated per 9.83 million population **1300 or 0.0132248%**

11/10/2022, **My News L.A.** reported the number of Covid-19 positive patients in L.A. County hospitals increased by 52, bringing the total to **492 patients admitted to the hospital**. 43 of the 52 admitted patients were admitted into the I.C.U. which was **down by 10 from the previous day**. **L.A. County reported a total of 1,662 new cases.**

My News LA reported the statewide total of Covid-19 positive patients, rose by 99, bringing the total to **1,855 cases.**

Case rate per 9.83 million population **1,662 or 0.01690%**

New Covid-19 admissions per 9.83 million population **492 or 0.0050%**

State Covid-19 Admissions per 39.24 million population 1,855 or 0.0047%

11/08/2022, **CBS L.A.** news reported a total of 1,433 new positive cases of Covid-19, there was a slight uptick over the weekend, reporting **2,978 positive covid-19 cases**. CBS LA reported **440 hospitalizations** in L.A. County which was slightly a lower figure compared to the numbers that were reported over the past two days (448 & 442).

Case rate per 9.83 million population **2,978 or 0.03029%**

New Covid-19 admissions per 9.83 million population **440 or 0.0045%**

11/05/2022, My News L.A. reported **1,447 new covid cases in L.A. County as of Friday**, and **7 new "virus-related" fatalities. It was not distinguished what these virus-related deaths were (Influenza, RSV, Covid-19)** Health officials have said many of the deaths from Covid-19 are either elderly or have underlying health conditions, or both. The number of **Covid-19 patients in L.A. County hospitals have increased to 453**, and 44 of those were being treated in intensive care. **My News LA did not report the status of the other 409 patients** that were treated in L.A. County hospitals, only can presume they were either released back home or were admitted for other reasons later testing positive for Covid while at the hospital.

Case rate per 9.83 million population **1,447 or 0.01472%**

New Covid-19 admissions per 9.83 million population **453 or 0.0046%**

Death rate per 9.83 million population **7 or 0.0000712%**

On **11/02/2022**, **Fox 11 news** reported the number of Covid-19 positive cases patients in L.A. County hospitals is on the rise. The data is showing on 11/01/2022 there were 388 Covid-19 patients in the hospital, on 11/02/2022 the number of positive Covid-19 increased to **427 positive cases in L.A. County hospitals.** L.A. County reported **1,392 new Covid infections**.

Fox 11 news reported that **40% of the admitted Covid positive patients were admitted due to "virus related illness"**, while the others were admitted for other reasons, and in many cases only learning they were infected when they were tested at the hospital. **171 of the 427 were admitted for Covid-19 related ailments** and **256 of the 427 were admitted for other reasons**, later learning they have tested positive for Covid while already being admitted into the hospital for other medical reasons.

Case rate per 9.83 million population **1,392 or 0.01416%**

New Covid-19 admissions per 9.83 million population **427 or 0.0043%**

I would like to add in all the above data from local sources and the CDC there **is no breakdown as to the vaccination status of the Covid-19 positive cases reported.**

I can only speculate that **if vaccination status were provided in the above reports, it would likely mirror the current data** the LAPD has provided. The **vaccinated would-be overwhelming majority of the new positive Covid-19 infections / admissions.**

Australian Public Health data finds ALL the 1,779 Covid related hospitalizations and ICU admissions were all vaccinated. The total Covid-19 deaths, 6.3% of those were unvaccinated, leaving 93.6% of the deaths being vaccinated. Same Covid-19 virus, same gene therapy shot.

Attention Local Media,

I have taken notice that local media reports on Covid-19 seem to be fewer and fewer in the past few weeks. Has something changed that I'm not aware of?

W. Blauer.

I have included my public comment below for November 1, 2022. I find it very bizarre that all public comments for 11/01/22 are not able to be viewed in the archives on your web page. In event the files somehow got corrupted, and you are not able to post the public comments. This public comment is detailed and clearly defines the Covid-19 trends at that time, conflicting with what Commissioner Briggs informed the public on 9/20/22 and 10/25/2022.

11/01/2022

Hello everyone, as always, I hope you all are doing well. Based on Chief Moore's Covid-19 reports year to date **(January 11, 2022 – October 25, 2022)** the vaccinated are making up **76%** of the infections within your department. In the month of October, Chief Moore reported a total of **58 Covid-19 infections** within the LAPD. **The vaccinated made up 42 of the 58** total infections, **72% of the infections** were from the vaccinated population within the LAPD for the month of October.

Based on the CDC indicators and thresholds, on **9/2/2022**, **the CDC moved LA County into the low Community level** for severe illness from Covid-19. Reflecting minimal stress on the hospital systems in LA County associated with Covid-19. Per the CDC many people in the U.S. have some protection, or immunity, against Covid-19. This immunity, combined with the availability of tests and treatments, has greatly reduced the risk of severe illness, hospitalizations, and death from the Covid-19 for many people.

As leaders of the C.O.L.A. it is important to stay up on current trends. Let me be a little clearer as what I'm speaking of, on **9/20/2022**, **(18 days after the CDC published their report)** Commissioner Briggs **advised that the state of emergency remain active because of increased covid cases, increased hospitalizations and death, Briggs further added that these cases have increased from one month prior and continue to pose an imminent risk to health.** This was the **verbiage that he used on 08/23/2022** to extend the emergency as well.

On **10/25/2022** Commissioner Briggs continues to read this same verbiage from his computer screen to extend the state of emergency. **Commissioner Briggs, I'm going to make a formal request, that you provide your source of where you are getting this data from and provide it to the public.**

Let's compare what Commissioner Briggs said to what the CDC has published for L.A. County for Covid-19 numbers.

October 13, 2022, per the **CDC.**

Case Rate per 100,000 population	**73.42 or 0.073%**
New Covid-19 admissions per 100,000 population	**4.9 or 0.0049%**
% Staffed inpatient beds in use by patients with confirmed Covid-19	**2.8%**

October 20, 2022, per the CDC

Case Rate per 100,000 population	**52.05 or 0.052%**
New Covid-19 admissions per 100,000 population	**4.3 or 0.0043%**
% Staffed inpatient beds in use by patients with confirmed Covid-19	**2.4%**

October 27, 2022, per the CDC

Case Rate per 100,000 population	**96.75 or 0.097%**
New Covid-19 admissions per 100,000 population	**4 or 0.004%**
% Staffed inpatient beds in use by patients with confirmed Covid-19	**2.2%**

November 3, 2022, per the CDC

Case rate per 100,000 population	**68.66 or 0.069%**
New Covid-19 admissions per 100,000 population	**4.3 or 0.0043%**
% Staffed inpatient beds in use by patients with confirmed Covid-19	**2.2%**

The CDC publishes new Covid-19 data every Thursday, you can even access what area you want to search. I simply type Covid Tracker in the search bar, **which brings you to a secured CDC website** and then enter Los Angeles County for the area that I want to search. **I would encourage the Police Commission and Chief Moore to do your own research along with checking the dates on the data that you are receiving before disseminating to the public.**

My question to every one of you is this, based on the data that Chief Moore has provided on Agenda item #1 and the data from the CDC on Covid, why is the city of Los Angeles proceeding forward with this Covid-19 mandate? I know this has been asked several times in the past, but it has never been answered. Being vaccinated does not prevent an individual from contracting or transmitting Covid-19.
